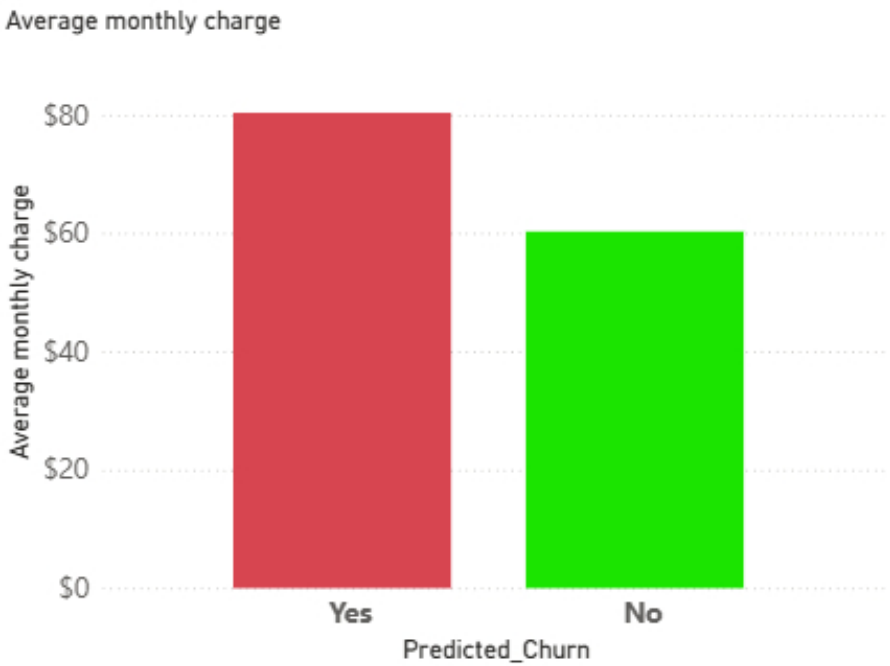
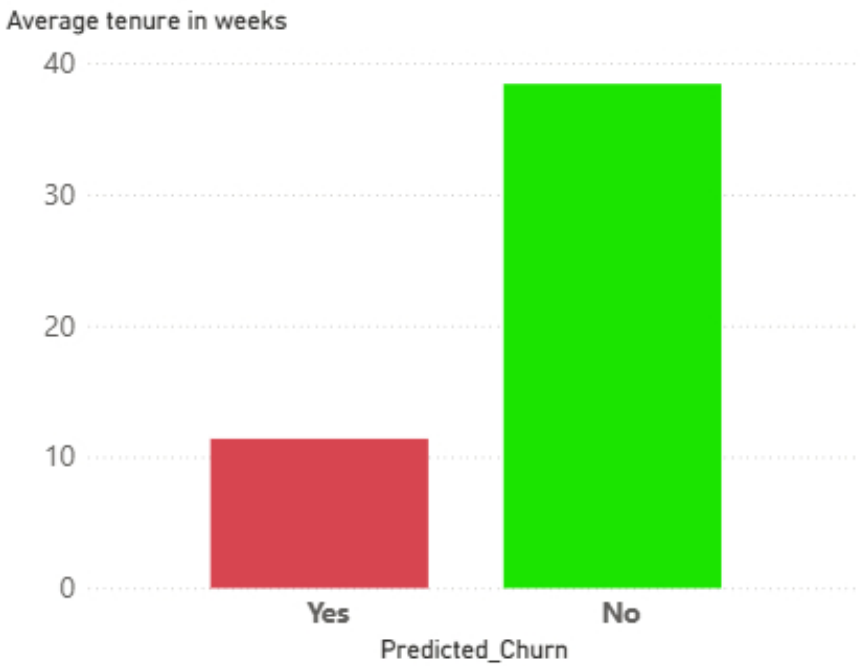
Total revenue	Percent of churned lost revenue	Churned lost revenue

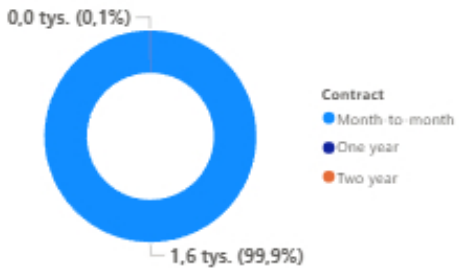




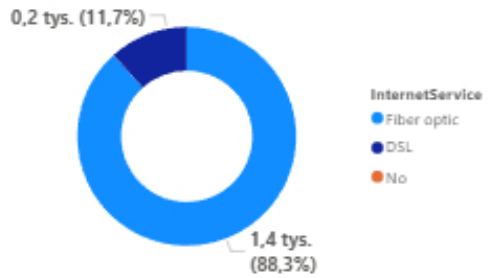
Churned Client Profile

The selected segments are those with the **strongest and most unambiguous impact on churn**, and they do not include demographic variables. In each of these segments, the difference between customers who leave and those who stay is **clear and one-sided**, making them the **most significant factors increasing the risk of churn**.

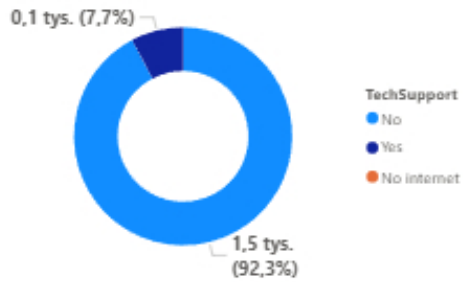
Contract churned



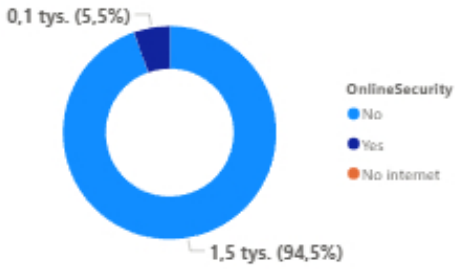
Internet Service churned



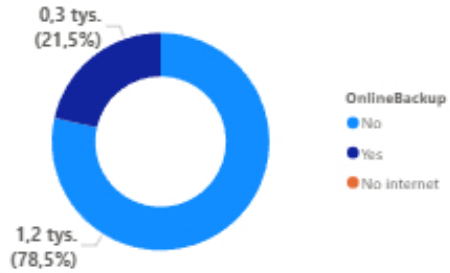
Tech Support churned



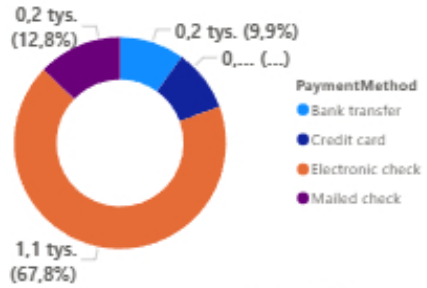
OnlineSecurity churned



OnlineBackup churned



Payment Method churned



42

Total percent of churned clients	8%
Tenure (MONTHS)	42
Cum. Lost month revenue	$123 635,0
Cum. Lost month revenue in TOTAL	$126 620,0
% of Month Lost Revenue	98%

OVER ALL "High" & "Medium" Risk

$31,1 tys. "High Risk" Monthly Revenue	**$95,5 tys.** "Medium Risk" Monthly Revenue

For further analysis, we selected five segments with the highest cumulative revenue loss — **Month-to-Month, Fiber Optic, Security = No, Tech Support = No, and Online Backup = No** — as together they account for **more than 80% of the total value lost**. We also assume an observation **window of up to 22 months**, since this period **captures 80% of all churn-related revenue loss.**

Contract: Month to month

$31,0 tys. "High Risk" Monthly Revenue	**$70,4 tys.** "Medium Risk" Monthly Revenue

"No" Tech Support

$30,8 tys. "High Risk" Monthly Revenue	**$84,7 tys.** "Medium Risk" Monthly Revenue

Internet service: Fiber Optic

$30,6 tys. "High Risk" Monthly Revenue	**$63,9 tys.** "Medium Risk" Monthly Revenue

"No" Online Security

$30,8 tys. "High Risk" Monthly Revenue	**$64,1 tys.** "Medium Risk" Monthly Revenue

"No" Online Backup

$27,2 tys. "High Risk" Monthly Revenue	**$69,5 tys.** "Medium Risk" Monthly Revenue

TOGETHER "High" & "Medium" Risk up to 22 months window and 5 segments

$31,0 tys. "High Risk" Monthly Revenue	**$70,6 tys.** "Medium Risk" Monthly Revenue

⭐ Churn Analysis – Executive Summary

The analysis shows an overall churn rate of **22%**, resulting in **$1.6M cumulative revenue loss** over 72 months. The loss is driven mainly by customers with an **MRPU of ~$80** and an average **tenure of 11.38 months**, indicating that most value leakage occurs early in the lifecycle.

Five segments demonstrate the strongest impact on churn probability and revenue loss: **Month-to-Month, Fiber Optic, No Online Security, No Tech Support, and No Online Backup.** Across these segments, churn-driving factors reach **~90% influence**, making them the primary contributors to attrition.

Time-based analysis shows that:

- **80% of all churn-related revenue loss occurs within the first 22 months**,
- **40% occurs within the first 5 months**.

The churn-propensity model identifies **$31.1K in High-Risk** and **$95.5K in Medium-Risk monthly revenue**, representing **100% of the revenue currently exposed to churn** within the critical segments.

Focusing on the **first 22 months** and the **five high-impact segments** maximizes the potential for recovery, as these areas collectively account for **over 80% of the $1.6M loss** and represent customers with low bundling, high sensitivity to contract structure, and limited service add-ons.
